STUD EARRING WITH A REMOVABLE DANGLE ELEMENT

ABSTRACT OF THE DISCLOSURE

A jewelry design for adorning an ear which
5 includes a conically-shaped stud mounting extending
conically outward from a conical point to form a
conical basket for securing a stone therein, a post
with a near end attached to the conical point and a
far end, and a nut engagable with the far end of the
10 post for securing the stud mounting to the ear; a
dangling element; and an intermediary connecting
member which removably engages an exterior surface of
the conical basket, and which includes a jump ring
extending outward therefrom for flexibly supporting
15 the dangling element so that it is removably
suspendable below the stud mounting.
